TELs classes are designed to facilitate active and collaborative learning. They are equipped with multiple projection screens, white boards, one or more overhead projectors, round tables that seat 9, and technology available for student use at each of the tables (three computers per table). DSH 224 (n=54), CTLB 330 (n=63), and CTLB 300 (n=126).

**NOT SURE?**

The Center for Teaching Excellence (CTE) is ready to provide support! CTE offers services intended to help instructors design or redesign their courses (workshops, consultations, observations of teaching, student feedback, and online resources). We would be happy to brainstorm ideas for teaching your course in one of the TELS. We will also be offering workshops specific to collaborative and active teaching techniques for TELS. (Workshop schedule available [HERE](#))

Proposals to teach in TELS (Spring 2020) will be accepted in mid-September. Please see CTE website for more details.
